### THE FORWARDING OF PLANTS, BULBS, SEEDS, ETC., BY MAIL AND EXPRESS, A SPECIALTY.

It affords us pleasure to state, in the present Catalogue, that our trade in supplying amateur and other cultivators throughout our country, as well as Canada, Nova Scotia, and other adjacent foreign countries, with Plants, Seeds, etc., is growing steadily and rapidly. For the past two years, our success in this branch of our business has been extraordinary, we may say, not only as regards a marked increase in number of patrons, but also in the uniformly good results which have attended the forwarding of stock—especially Plants by Mail and Express—to customers. This branch receives the constant, watchful attention of one of the proprietors, and we feel that the results alluded to, are but a natural outgrowth incident to the great amount of labor and thought which has been expended, in systematizing and improving its working throughout, and in studying what kinds and varieties of stock would prove most satisfactory to purchasers. More is said of this matter of choiceness of kinds, on another page, as we deem this a subject of moment to all buyers who make selections from catalogues.

That live growing Plants are susceptible of being packed so perfectly, and at the same time sufficiently compact, to carry with safety to the most extreme parts of America, that are reached by railroads, seems strange to many persons who have never given the matter a trial. But that this is possible, and to a most satisfactory degree to recipients, is practically demonstrated almost continually, throughout the entire year, at our establishment. We frequently forward between 100 and 300 packages, alone, of Greenhouse and Hardy Plants by Mail daily in the spring months, some of them to points thousands of miles distant, and so unexceptionally successful has our present improved mode of packing proven itself, that although for years we have advertised and still continue most emphatically to GUARANTEE the SAFE ARRIVAL of PLANTS by MAIL and EXPRESS, in good condition, and are pleased in all cases to make such guarantee *entirely satisfactory*, yet less than a score of reports have been received annually in the past few years in which it has been stated that Plants were received in bad shape, and in these the causes were frequently attributable to something which had transpired after the Plants had left us, and consequently beyond our control. In these few cases we have most cheerfully refilled the orders, to the full satisfaction of the persons who ordered. On the other hand, we are, every year, made the recipients of hundreds of verbal and written testimonials from those who receive stock from us, in which they attest, in warm terms of praise, to the fine quality of the articles sent, and the excellent condition in which they reached them. We take the liberty of devoting a few pages of a pamphlet that accompanies our Catalogue, to printing some of

\* Buffalo is situated on Lake Erie, at the head of Niagara River. It is 425 miles nearly west from New York. Rochester, N. Y., is a neighboring city, 69 miles east, on the New York Central Railroad.

these, to which we refer strangers, believing they will be more convincing than any mere statements of ours. With these few introductory remarks, we are led to speak of

## OUR MANNER OF DOING BUSINESS,

whereby customers at a distance, as well as hundreds in the city of Buffalo, derive such satisfactory results.

**Whether in Plants, Flower Seeds, Bulbs, or other Stocks, we advertise and deal in none but good and tried varieties.**—In admitting kinds and varieties into our Catalogue, we are guided wholly by the merits of each, as regards good quality and desirability for amateur cultivators. We pay much attention every season to testing new sorts, and the regular sorts of other growers, for the purpose of including in our own Catalogue the very best the world affords. Sometimes as many as one-half or two-thirds of a lot of named sorts, that have been secured for trial, are discarded, simply because they do not come up to our standard in these respects. Those who receive our Catalogue will readily recognize the advantage this is to customers. In the limits of a catalogue, it becomes necessary to describe varieties somewhat briefly, and on this account we prefer to protect those who patronize us, against selecting indifferent or poor varieties, by placing nothing in our lists but what will prove satisfactory, *where a proper estimate is placed upon the adaptability and value of each.*

**A Fair Equivalent for the Price asked.**—We ask what we believe are fair prices for the articles we grow and deal in, and such as will enable us to furnish, in Greenhouse and Bedding Plants, Bulbs, etc., good, well-established unforced stock of fair size and form, and in Flower Seeds the best quality procurable, and a liberal quantity in each packet. Prices are fixed at a rate that pays for the stock itself, and for the labor spent in executing orders, which, by our painstaking system, is of itself considerable; also for postage, when stock is sent by Mail, and for the baskets and boxes, extra plants, etc., when sent by Express.

The strikingly great difference there is in the cost of producing different kinds of Flower Seeds that are offered, and the consequent differences in the quantities furnished in packets at advertised prices, render it in place here to introduce a few words explanatory. We quote Flower Seeds by the packet at prices ranging from 5 cents to 25 cents. In a single paper of some kinds, such as Mignonette, Candytuft, Amaranthus, etc., we fill in many hundreds of individual seeds in each, as would be found were they counted, and sell at five cents per packet. On the other hand, packets of the choicer kinds of Asters, Stocks, Double Petunias, etc., that we ask 20 or 25 cents a-piece for, each contain only perhaps in the neighborhood of one hundred seeds, some even less than this number. The quantities furnished, and the prices are regulated by the cost of producing. Extensive growers in the great seed producing districts of Germany and France, calculate that *five or six pounds* of some kinds that we sell large packets of at five cents a piece, cost no more to grow, gather and clean, than *one thousand individual seeds* of other kinds we offer, at our highest quoted prices, and they fix their selling prices accordingly. Some kinds are so choice and costly that they are *never offered in any other way than by the thousand and ten thousand*, and this, too, by growers with whom it is common to sell Mignonette and other cheap kinds by the ton weight. We speak of this, so that customers may have no occasion to place a wrong estimate on our actions in these particulars.

**All Stock plainly labeled.**—All stock that leaves our place is sent out distinctly labeled. In the future we shall use an excellent new style printed label of our own getting up, for all Plants that are ordered. By our method of packing, the labels cannot become separated from the plants to which they belong, during the journey.

**On receipt of an order for Plants, we notify the sender, by Postal Card, of the following form properly filled out:**

*Buffalo, N. Y.,* ..... 187 ..

*We beg to acknowledge receipt of your favor of the* ..... *inst., for which accept our best thanks. The Plants ordered will be forwarded by* ..... *early in week beginning with Monday* ..... *inst.*

..... *The Seeds are being mailed separately.*

*Full directions for treating Plants, Bulbs, etc., that have arrived by Mail and Express, may be found on page 5 of our Catalogue for Spring of 1876.*

*Yours most obediently,*

LONG BROTHERS,  
FLORISTS, Seedsmen and Nurserymen.

As will be seen by reading the matter of the above Postal Card form, all orders for Plants are despatched early in the week. We consider that the sooner a package of plants is received, opened and the contents properly cared for, after leaving our greenhouses, the better; and by adopting this plan the majority of packages never lay over the Sabbath on the route. Seed orders in all cases are forwarded as soon as possible after they arrive.

MAR 13 1933

Relative to our Manner of Packing Plants, Seeds, Bulbs, etc., which hundreds pronounce superior to that practiced by any other establishment, also our Guaranteeing their safe arrival.—Scarcely one other thing connected with receiving floricultural stock, and especially green, living Plants, by Mail or Express from a distance, is as directly important to the receiver, as the way in which they are packed. Judging from reports that reflect on this matter, and which are almost constantly arriving from every part of the country, in the letters of our friends and customers, it would seem that there is really less risk attendant upon ordering plants from an establishment 3,000 miles distant, where the highest degree of perfection has been attained and is practiced in packing, than in ordering from a point 100 or 200 miles distant, where less skill is brought to bear on the operation. We consider it would be needless to say many words relative to our manner of executing this important feature of our work, further than to state that the member of our firm in charge of this department gives to it such a degree of attention and study as he in his experience believes it deserves, owing to the importance of having everything connected with executing orders, rightly done in every particular and in all cases. We have allowed some of our patrons of past seasons to have a voice in relation to this matter of how well we pack; and in a small pamphlet which accompanies our Catalogue will be found their unsolicited testimony. Let it be understood that

## WE GUARANTEE

EVERY ORDER OF PLANTS to reach its place of destination in any part of America, where the ORDINARY TIME OF TRANSIT by Mail or Express and stage in remote sections, is not more than TEN DAYS, safely, and in good condition for growing, at any time of the year, excepting during the three months commencing with December 1st and ending March 1st of each winter. We guarantee

EVERY ORDER OF SEEDS, Dormant Bulbs, Tubers, etc. (the latter up to May 1st in their dormant state) to arrive safely in any part of the country, no matter how extended the time of transit may be, and at any season of the year when our stock is in shape for sending out.

To enable residents in all parts of America to decide whether it will be safe for them to order Plants, as well as other Floricultural stock, by the above conditions of guaranty, we have prepared the following table from official sources, showing what the ORDINARY TIME is which mail trains require, to travel from Buffalo to the *extrem points named*, all of which are reached by railroads.

FROM BUFFALO		FROM BUFFALO	
To Marquette, Mich., . . . . .	57 hours = 2 days 9 hrs.	To Pueblo, Colorado, . . . . .	100 hours = 4 days 4 hrs.
" Duluth, Minn., . . . . .	72 " = 3 " 0 "	" Austin, Texas, . . . . .	105 " = 4 " 9 "
" Bismarck, Dak. Ter., . . . . .	105 " = 4 " 9 "	" New Orleans, La., . . . . .	81 " = 3 " 9 "
" Cheyenne, Wyoming, . . . . .	74 " = 3 " 2 "	" Tallahassee, Florida, . . . . .	142 " = 5 " 22 "
" Ogden, Utah, . . . . .	103 " = 4 " 7 "	" Columbia, S. Carolina, . . . . .	69 " = 2 " 21 "
" Sacramento, California, . . . . .	144 " = 6 " 0 "	" Baltimore, Md., . . . . .	26 " = 1 " 2 "
" Redding, Cal., 200 miles		" Bangor, Maine, . . . . .	48 " = 2 " 0 "
N. of San Francisco, . . . . .	157 " = 6 " 13 "	" Halifax, Nova Scotia, . . . . .	81 " = 3 " 9 "
" Calienth, Cal., 300 miles		" Quebec, Province of	
S. of San Francisco, . . . . .	162 " = 6 " 18 "	Quebec, . . . . .	48 " = 2 " 0 "

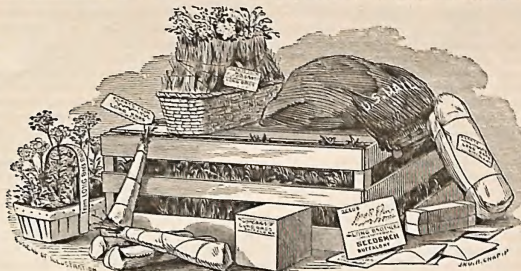

It will be observed that the places here named are situated near the borders, and less time will be required to reach others that are inland from these. Some allowance is made for the transfer of mails at the terminals of the various railroad lines, but nothing for the *increased speed* of the recently established Fast Mail Trains which now carry all mails from Buffalo, east and west.

There are many places throughout the Western Territories that are reached only by mails carried from the railroads long distances, sometimes many hundreds of miles, by stage or horseback. Persons residing in these can order Seeds, Bulbs, etc., and receive them safely (see our Guarantee respecting Seeds), but they must decide for themselves whether it will be prudent to order Plants. In the majority of cases our Plants will carry from ten to fifteen days in safety, although we do not warrant them longer than the former length of time. We have numerous customers who order plants from these remote places at their own risk, again and again with satisfactory results. Such and others living thus remote are advised to send small orders, and oftener, so that the sacrifice will not be so great in case of loss. On all mail packages of plants, we print the State or Territory to which each is to go in plain, bold type, which somewhat expedites their progress.

## SPECIAL.

**No. 1—with reference to filling orders and forwarding Floricultural Stock BY MAIL, POSTAGE PREPAID.** Plants, Bulbs, etc., are forwarded through the mails in light boxes or in packages; Flower and Vegetable Seeds in envelopes or packages, but the U. S. POSTAGE is in all cases fully prepaid by us to the office of delivery, or to the boundary line, if to a foreign country. It must, however, be understood that, although orders under *One Dollar in amount for Flower and Vegetable Seeds, in packets*, will be filled and the postage prepaid, yet with our painstaking method of *packing Plants* for mailing—of itself rather costly—which is done in damp moss, allowing a portion of the ball of earth to remain with the roots of each plant, besides with prepaying the postage, which is more in proportion on plants than on seeds, owing to the damp soil and packing moss which are included, **WE CANNOT ACCEPT, EITHER COMPLETE IN THEMSELVES, OR AS PART OF MAIL SEED ORDERS, ANY ORDER FOR PLANTS OF LESS AMOUNT THAN ONE DOLLAR, unless the cost of packing and postage is sent to us in connection with the price of the**

**\$1.00**

\$1.00

plant or plants wanted, according to the following rates: Where a single Plant may be wanted, either alone or with Seeds, an addition of 10 cents to its price is required; where three or more, or less than One Dollar's worth are wanted, either alone or in connection with Seeds, an addition of 15 cents is required to the combined amount of their prices.

Customers should bear in mind that, to reduce bulk and weight, Plants for Mailing average a little smaller than those we Express; but in every other respect are fully their equals.

**No. 2—with reference to filling orders and forwarding Stock BY EXPRESS. No Charge for Packing.**—We practice filling orders and forwarding Plants and other stock by Express AT ANY SEASON OF THE YEAR WITH SAFETY. In the spring and also in summer, ordinary sized Plant orders to be sent by Express are, with rare exceptions, packed in light, strong chip baskets, and large orders, in open-work crates, after danger of freezing is past. Earlier in the season, and in late autumn, the method of packing is similar to the close packing in paper-lined boxes adapted for winter. We have effected arrangements with the American and also the United States Express Companies, whereby Plants and other floricultural stock which we may ship, will be carried over their lines, to many of the states, at SPECIAL REDUCED RATES. All Express and Railroad transportation charges must be paid at the office where they are received, but

\$2.00

NOTICE.—To every order for GREENHOUSE, TENDER AND HARDY PLANTS, BULBS, ETC., amounting to TWO DOLLARS AND UPWARDS, selected at Catalogue prices, and which is to be forwarded by Express, WE ADD WITHOUT COST SUFFICIENT STOCK TO COMPENSATE, USUALLY IN FULL AND MORE, FOR ALL TRANSPORTATION CHARGES; neither do we make any charge for BASKETS, BOXES OR PACKING on orders of this amount. The stock thus added will be of desirable quality and kind, but invariably subject to our choice; if, however, customers will mention the kinds of plants which they prefer as such compensation, we will comply with their desires as nearly as our stock will allow.

\$2.00

**Filling Orders from the British Provinces, Ontario, Quebec (Canada), Nova Scotia, etc.** We will fill orders for Flower and Vegetable Seeds in packets, and send by Mail postpaid to any post offices in the provinces named, but owing to the great increase in rates of postage on Plants, Seeds and other Floricultural Stock sent across the lines, and moreover being the weight of packages is limited to eight ounces each, we cannot accept orders for any stock but Seeds, to be sent by Mail. Our customers in the British provinces should therefore order their Plants, Bulbs, etc., to be forwarded by Express. Bulbs and Tubers pass free of duty, but on Plants there is a Duty of ten per cent. on cost price. If persons who order will name their nearest Port of Entry that is reached by Express, scarcely any delay will ensue in the Custom department. We arrange all necessary invoices, duplicates, etc., carefully and free of charge.

**On the Substitution of Sorts in Filling Orders.**—We scarcely ever find it necessary to substitute other kinds or varieties, either in Seeds, Bulbs, Plants, etc., for the ones asked for in orders. The necessity of so doing is more liable to occur in the case of Plants than with other stock, because these have to be grown to a salable condition, and no surplus can be stored on shelves or in bags, to fall back upon, if needed, as with Seeds, etc., but we practice a systematic course of propagating all kinds advertised, that is peculiar to our establishment, and which renders it next to impossible for us to be out of any sort unless very early or very late in the season. Sometimes it has happened that a certain variety or varieties have been called for in such unexpected large numbers that our stock has become exhausted, or so greatly reduced as to oblige us to send out smaller plants or larger plants cut back, than is customary in filling orders, until a new or recent propagation has grown up. When this occurs, we invariably add some other choice kinds, without charge, to make up for the deficiency in quality of such ones that have been ordered.

**Giving Directions (as follow) for the care of Floricultural Stock received by Mail and Express. Very Important.**—Next in importance to their being properly packed by the shippers, it is necessary that Plants (we will speak of these first) which have been received by Mail or Express be treated fairly after their arrival. All the information needed in attending to their simple wants in this respect is here given:

Whether the Plants are intended for bedding in the open ground or for pot culture, or for planting in hanging baskets, vases etc., they should first be specially treated, for several weeks, to encourage new action in the roots.

This is best accomplished by planting them in ordinary unpainted flower pots, and in any kind of light, open soil; but the pots should be of the smallest size that will answer for each individual plant—those two inches across at the top, inside measurement, will be most suitable for plants six inches or less in height. The pots should not be filled so full of soil but that they may receive and hold enough water to go through. This plan that we recommend, of allowing only a small quantity of soil to each plant, is one upon which florists invariably act in caring for any kinds of plants where the growth has been checked from any cause, and the principle is a correct one. The roots, at least some of them, of such plants are, in a measure inactive for the time being, and not in condition to imbibe much moisture and food, while getting a new start; and if more soil is given than is actually needed to sustain them, for a few weeks, the tendency might be that it would become sour-like, owing to the moisture contained in it. If no small pots, such as we have alluded to, are at hand, then some of larger size may be used, by first placing broken brick pieces, pot shreds or gravel in the bottom, and up to within four inches of the top, upon which to put the soil, and then planting the plants two and one-half inches apart in a circle, almost against the edge of the pots. Shallow wooden boxes might also be made to answer, if pots of no kind are to be had, by boring holes through the bottom, and also the sides, just above the bottom, for admitting air and allowing surplus water to escape. Gravel or other rough "drainage" should be filled in the bottom, and to within four inches of the top, before putting in the soil, and the plants be planted so close to each other that the leaves, when straightened out, will almost touch. Set the plants *firmly* in the soil, in all cases, being quite careful to allow all the soil that was left on the roots in packing, to remain. Water sufficiently soon after planting to moisten the soil throughout. After this first application, water *every time* the surface of the soil begins to show particles of dry earth, but no oftener, and at each of these times give an abundance of water.

After the Plants have been properly planted, the best place for them will be in a moderately warm place in the conservatory or on the window sill of a light window, in the dwelling. For a week or more the air may be kept rather cool and moist to their advantage, as they should not be quickly forced into growth. A simple and inexpensive means for securing moisture for the plants in any house, is to place the pots or boxes on a wide board, on the window sill, and then fasten a piece of cloth, or newspapers against the window, at a point two or three feet above the shelf, and allow it to hang down over and outside the shelf (or rather inside, towards the room), thus forming a sort of hood, facing the light, over the plants. This will sufficiently exclude the ungenial dryness of the atmosphere as it generally exists in our rooms. When the weather is warm, fresh air can be admitted to the plants from the outside by raising the window. None should, however, be admitted for the first forty-eight hours, and then only by littles for another week. The plants, whether in a conservatory or in the window, should also be shaded from the sun during the first week, by covering a single sheet of paper over them, while it is in a direction to shine upon them. Under such treatment the plants will soon start thrifty working roots, and then by giving them, at any time, a thorough watering, they can be safely transplanted to their places of future growth. Such a nursery is to be preferred to a hot-bed for managing newly received plants in.

If, under any circumstances, Plants when received seem rather too dry in the box for unpacking well, then enough water should be gradually allowed to drip on the moss about the roots, to wet it to the bottom, also some among the foliage. When the moisture has thoroughly penetrated throughout the box, the plants may be removed and treated as directed above. Where it is impossible to care for the plants immediately after they arrive, the cover should be taken off the box, so that the air can penetrate throughout the contents, a little water be sprinkled into it and all kept loosely covered with a damp paper.

Dry Bulbs, Seeds, etc., require no special care only to be kept dry and safe from mice and other vermin until time for starting them. Lilliums, Tritomas, Hardy Plants, etc., in their resting state, should be healed in sand or light soil in a cool cellar, where it is not too damp or too dry, until time for planting out; or, if received late, may be planted out at once. Dormant plants of Roses, Aloysia, etc., may be treated similarly, or be started into growth immediately, be it early or late, in the spring.

The above directions apply with about equal force to Plants and other stock received by Express as by Mail.

**We provide an instructive work on Floriculture, free to every new retail customer of our house who buys \$2.00 worth of stock.**

The work we allude to, and which we furnish to customers free, is entitled THE HOME FLORIST: it being a treatise on the cultivation, management and adaptability of all ordinary and many rare, Ornamental and Flowering Plants in the Open Air, Window Garden, and Amateur's Conservatory, embracing Hardy and Tender (Greenhouse) Perennials, Annuals, Biennials, Bulbs, Tubers, etc., with an extended chapter on Roses, besides affording much other general information. Its price is 60 cents, substantially bound in cloth, and 30 cents in paper covers, by mail, post-paid. This work was published in 1874, and up to the present time has met with very extended sale, aside from the copies furnished to our customers. Hundreds pronounce it to be exactly suited to their wants, and of more value than any \$1.50 or \$2.00 book on the same subject which they may possess.

#### CONDITIONS ON WHICH THE HOME FLORIST IS FURNISHED.

EVERY NEW CUSTOMER OF OUR HOUSE, who, during 1876, purchases stock to the amount of \$2.00 OR UPWARDS, NET, in any one order, and at Retail Catalogue prices, will be entitled to one copy of the HOME FLORIST, in paper, or by paying 30 cents extra, a copy bound in cloth, free of charge, by mail, postpaid.

PERSONS ORDERING AND PAYING for the HOME FLORIST IN ADVANCE, are allowed the privilege of applying its cost price in paper binding, 30 cents, towards paying any order for stock, amounting to \$2.00 OR UPWARDS, NET, which they may favor us with. To effect this readily, a certificate valued at 30 cts. is enclosed in EVERY COPY of the HOME FLORIST, BOTH IN PAPER AND CLOTH BINDING, WHICH HAS BEEN ORDERED AND PAID FOR IN ADVANCE, and THIS will be received in payment for any stock named in our Catalogue, THE SAME AS SO MUCH MONEY, as per these terms, and according to the conditions printed on its face.

By ordering the work immediately after our Catalogue is received, an opportunity will be afforded for studying its contents before stock will be needed, which will be advantageous if not directly profitable. BEAR IN MIND, that the certificate we enclose in each copy will be received by us the same as cash, in payment for stock.

**Discount allowed on Large Orders.**—We offer three distinct inducements, which apply to stock of different kinds and character, but no part of an order can be counted under more than one inducement.

**INDUCEMENT No. 1.**—We will allow PLANTS AND BULBS at Catalogue prices—

To the amount of \$4.00 to be selected, for a remittance of \$3.65	
“ “ 6.00 “ “ “ “	5.40
“ “ 10.00 “ “ “ “	8.85
“ “ 18.00 “ “ “ “	15.35
“ “ 30.00 “ “ “ “	24.00
“ “ 45.00 “ “ “ “	34.80
“ “ 70.00 “ “ “ “	52.50

**INDUCEMENT No. 2.**—

Persons remitting \$1.00 may select seeds at Catalogue prices, amounting to \$1.15	
“ “ 2.00 “ “ “ “	2.30
“ “ 3.00 “ “ “ “	3.55
“ “ 4.00 “ “ “ “	4.90
“ “ 5.00 “ “ “ “	6.25
“ “ 10.00 “ “ “ “	13.00
“ “ 20.00 “ “ “ “	27.00

These rates can only be allowed on VEGETABLE AND FLOWER SEEDS IN PACKETS.

**INDUCEMENT No. 3.**—ON COPIES OF THE HOME FLORIST. To any person who will send us \$1.50 for 5 copies of the Home Florist in paper covers, we will add ONE COPY IN PAPER COVERS FREE OF CHARGE. For \$2.10 sent us for 7 copies bound in paper, we will add ONE COPY IN CLOTH BINDING FREE OF CHARGE. For \$3.00 sent us for 5 copies of the Home Florist bound in cloth we will send one additional copy BOUND IN CLOTH free of charge. Each copy, as well as the premium one, thus ordered will contain one of the 30 cent certificates alluded to above, and will be sent postpaid to one or more addresses as best suits the sender.

## PERPLEXITIES OF CORRESPONDENCE.

It is in the experience of every person or business house that is in the receipt of much correspondence, to meet with numerous instances where writers have made important omissions in penning their communications, or have written some parts illegibly, or otherwise inaccurate. These may generally be supposed to come from persons, who not being much in practice in writing business letters, and being desirous to render the contents of such plain, are apt to overlook such important parts as getting their Post office address, State, or even their own name—for it is in these things that the imperfections we allude to usually occur—plain and accurate. Each of us is so perfectly familiar with our own name and address, that in writing, it is easy to have it seem as though the party addressed knows it as well, and, while dealing in our communication with matters and facts that the receiver is likely to be familiar with, the name and address is to a great degree the most important part of the letter.

We venture to say that one out of every fifty, perhaps every thirty, letters we receive by mail, is deficient in the one particular of the State or Territory in which the writer resides, having been omitted. From the frequency with which this occurs, it looks as though many writers considered that to give the name of their State was of little consequence. We give an example of this character, it being one of many that are now in our office, and which remain unattended to. This particular one is given because of its brevity. The writer's name was signed plainly and in full, but is here omitted, save the initials.

Berlin Feb 8. 1875-

Messrs. Long Bros

Please send me the Home Florist  
and also illustrated Catalogue of Plants  
Enclosed find 30 cents

Mrs S C

This is received from Berlin, somewhere, but to show how utterly impossible it is for us to decide where the Berlin is to which we are to address the work ordered, we give a list of the post offices—eighteen in number—of this same name in our country.

Berlin, Hartford Co., Conn.  
Berlin, Sangamon Co., Ill.  
Berlin, Hardin Co., Iowa.  
Berlin, Riley Co., Kansas.  
Berlin, Bracken Co., Ky.  
Berlin, Worcester Co., Md.

Berlin, Worcester Co., Mass.  
Berlin, Ottawa Co., Mich.  
Berlin, Steele Co., Minn.  
Berlin, Gentry Co., Mo.  
Berlin, Camden Co., N. J.  
Berlin, Rensselaer Co., N. Y.

Berlin, Holmes Co., Ohio.  
Berlin, Somerset Co., Pa.  
Berlin, Marshall Co., Tenn.  
Berlin, Washington Co., Va.  
Berlin, Southampton Co., Va.  
Berlin, Greenlake Co., Wis.

The above is no extreme case as regards the number of times one name is used as the name of different Post offices in the different States and Territories. Some names are used in as many as *twenty-one* cases, and thousands are used from three to twenty times each.

It is a small saving of time to represent the names of States and Territories by abbreviations. But particular care should be exercised to write distinctly, especially as several of these do not look greatly unlike, in script. A short time ago we received a communication from the state of Maryland as we supposed. Subsequent occurrences revealed that we were in error in supposing this, and the accompanying *fac simile* will explain to the reader how much we were to blame, because a gentleman in Indiana (Ind.) did not receive matter, that was directed to his name and post office to which was added *Md.* for state, as we had done in directing his order. 

Frequently a letter and order arrives, in which the sender neglects to give any clue to his or her name. All we can do in such cases is to place the letter and money aside, hoping to hear from the writer soon again. We usually receive a second letter from the same place and in the same hand writing, asking whether such and such an order reached us, and this one very likely contains the person's signature, which sets us on the right track for executing the order. At the end of every season we are reluctantly compelled to store away a batch of such letters without signatures, where the parties never wrote again concerning them.

In numerous cases we are required to do more guesswork in making out badly written addresses and signatures than seems consistent with serving persons who have entrusted money and orders to us. The names of post

offices occasionally bother us in this respect. There are over 34,000 offices in the country and hundreds of odd, meaningless names, such as Gerlaw, Gann, Gomer, Hico, Ion, Stuart's Draft, Gowry Bridge, Uwhland, Upshur, Gastrides, etc. We considered that the address here figured belonged to this odd class—Somel Budge, Ky.—until we were enlightened to the fact that it was designed for Laurel Bridge, Ky. Sometimes we receive a communication or order that is faultlessly written throughout until it comes to signing the name, which is executed perhaps in dashing style, and with flourishes that renders it anything but intelligible. 

## SUGGESTIONS TO OUR CUSTOMERS.

1. Before ordering stock, become conversant with our manner of doing business, as explained in the preceding pages, and also in the matter which here follows.
2. Write all communications distinctly, including your own signature, the names of your Post office, Express office if necessary, County, State, Territory or Province, and also the kind of stock desired, using the order sheet if you have one.
3. In writing a letter, with an order, keep the matter of each separately. Merely alluding here and there in the letter to what is wanted is not sufficient, but the names of the kinds should be repeated at the end of the letter or elsewhere, and written orderly in column form. We sometimes receive small orders where the names of plants, seeds, etc., wanted are scattered through three or four pages of matter, rendering mistakes by overlooking some kinds, in filling, quite liable.
4. It is a capital plan to make a copy of every order sent out and keep it until the stock arrives, to see that all is right. Sometimes people forget the exact nature of their orders, if not copied, and write to us afterwards inquiring why such and such a kind was not sent, when we learn by turning to the original order that it had never been called for.
5. New customers who are entitled to a copy of the HOME FLORIST according to the conditions published on page 6, will oblige us by mentioning the fact in their order, thus also hastening its arrival.
6. **How to Remit.**—Always send Postoffice orders when possible, as they are safe and convenient, or draft on New York City, but do not send checks or drafts on local banks in your section, as we cannot get these cashed without annoyance and extra expense; when neither Postoffice orders or drafts on New York can be obtained, send the money in a registered letter, which is a safe means, and they can be procured at any Postoffice in the United States; upon these place ten cents in stamps besides the regular postage. Every postmaster is required to register a letter when requested. In sending small sums of currency in an ordinary letter use postage stamps in preference to coin for making up the exact amount.
7. Be sure your letter containing order and remittance has been deposited in the Postoffice. Instances have occurred where a letter has accidentally been carried about in the person's pocket who wrote it, or in a friend's pocket, for weeks after it was supposed to have gone on its mission.
8. No stock will be sent C. O. D. (collect on delivery) unless one-third of the amount is received with the order. With this exception our terms on retail orders are invariably Cash with the order.
9. If an order should arrive in damaged condition from any cause, or if any error occurred in filling it, notify us at an early day, that we may take steps to rectify the matter or refill the order. See "On the Substitution of Sorts," page 5.
10. Do not ask us to do what is contrary to our way of doing business as set forth in our catalogues and price lists, and particularly send us no orders for Plants amounting to less than \$1.00, unless you add for cost of packing, etc., according to Special matter on page 4, (will fill SEED ORDERS of any amount,) neither ask of or expect us to furnish any kinds or varieties we do not advertise.
11. We publish two Catalogues annually, besides special price lists, circulars, nursery price lists, etc. Our General Spring Catalogue is issued early enough to be ready for mailing by January 1 of each year, and our Autumn Catalogue of Hardy Bulbs, Winter Flowering Plants, etc., is issued in August of each year.

Tea-Scented Rose-bud. (See page 19.)

Carnation Flower. (See page 11.)

# LONG BROTHERS'

## GENERAL

## HANGING BASKETS.

Hanging Basket Packed for Shipping.

PRICES.—Twelve inches in diameter, from \$2.00 to \$3.00; Ten inches in diameter, \$1.75 to \$2.25; Eight inches in diameter, \$1.50 to \$2.00; which figures include the cost of packing.

The various priced Baskets of the same size differ only in size of plants; in every other respect, as regards soil, and suitable varieties of free-growing habit, they are alike and first-class in every respect. Usually, a Basket of certain size is larger, and contains more soil than one would likely think. Our Baskets have a somewhat mound-shaped surface when filled, a third or fourth of the soil being above the level of the rim. In ordering, customers should state whether they desire the Baskets for hanging or for filling Vases; sizes and prices are the same.

The culture and sale of Hanging Baskets is one feature of our business, and hundreds are shipped from our greenhouses every spring and autumn. So perfectly is our method of packing adapted to their carriage, that of hundreds sent by Express, some over one thousand miles away, we have never received a single complaint of any not having arrived at their destination in safety.

We pack in durable, open work crates, made of light material (see cut). The foliage is exposed to light and air, and being in plain sight, ensures the crate being carefully handled by express employees.

We use plants of the best quality only, and such kinds as our experience has taught us will be satisfactory, both regarding their beauty and adaptability to this means of culture; while in planting each basket, taste is displayed to dispose of the plants in a manner creative of the best effect with all employed.

### Baskets Planted for Vase Filling.

These are the ordinary wire, moss-lined baskets, without the pendants or supports, which are filled with plants more especially suitable for Vases. These can be shipped equally as well as those designed for hanging, and it is a great convenience thus to fill vases, to say nothing of being advantageous. The wire structures may remain surrounding the plant earth when set in the vase, as the meshes are sufficiently open not to impede the growth of the roots. The space, if any, between the sides of the vase and the basket-ball of earth should be filled with good fresh soil.

## FLOWERS FROM SEED.

## A CLASSIFICATION.

No matter scarcely what object the florist—either amateur or professional—may have in view in decorating with flowers, especially in the open air in summer, some that can be grown from seed may be used in connection with Greenhouse Bedding Plants, Bulbs, etc., to excellent advantage. There are numerous Annuals, Biennials and Perennials that are easily grown, of which the seeds are inexpensive and the quality of the flowers, in points of brilliancy of color, sweetness, freedom of bloom, fine form and habits (especially as climbers) cannot be much excelled, if any at all, by the best of other sections. Our Catalogue annually falls into the hands of many who do not feel themselves sufficiently well acquainted with the various kinds to discriminate between those that are most, and those that are least, desirable for cultivation, and for this reason we devote some space to classifying the various kinds we offer in the following pages, according to their desirability and respective peculiarities.

In speaking of kinds, we have reference to families. Aster, Pansy, Stock, Zinnia, etc., are each a kind, while there may be, usually are, numerous varieties under each of these and other distinct kinds.

## KINDS WHICH SELDOM DISAPPOINT GROWERS, AND WHICH ARE EASILY GROWN.

Alyssum, Sweet.	Delphinium.	Portulaca, single.
Antirrhinums.	*Dianthus.	*Portulaca, double.
Asters.	*Hollyhocks.	*Stocks.
*Balsams.	Mignonette.	Sweet Pea.
Candytuft.	Pansy.	Tropæolums.
Dwarf Celosia.	Petunia, single.	*Double Zinnia.
Convolvulus Major (Climber).	*Petunia, double.	Wall Flower.
	Phlox Drummondii.	

Those with a star (\*) prefixed to the name are not as certain of giving entire satisfaction as the others, *unless due allowance is made for the fact that these, being called double kinds, will never yield more than a certain percentage of fully double flowers* from the best seed that can be saved, and we offer no other. But the flowers that do prove double are so exceedingly attractive that cultivators should not think of passing these by in making their selections. Seed saved of some years will yield more double flowers than of others, even with the same care bestowed upon having the stocks in good condition, fertilizing, etc., in each instance.

## KINDS VERY CHOICE, BUT SOMEWHAT DIFFICULT TO START FROM SEED.

Cobæa Scandens (Climber).	Lobelia Cardinalis.	Salvia Splendens.
Delphinium Formosum.	Maurandia (Climber.)	Thunbergia.
Stipa Pennata (Grass).	Mimulus.	Tropæolum Peregrinum.
Heterperum Sanfordi (Everlasting).	Mirsyphyllum—Smilax.	Verbena.
Ipomæas (Climbers).	Rhodanthe (Everlasting).	

## KINDS WITH SHOWY FOLIAGE, OR OTHER QUALITIES, WHICH RENDER THEM CONSPICUOUS AS SINGLE SPECIMENS OR IN CLUMPS FOR THE BACKGROUND.

Canna.	Ricinus.	Hollyhocks.
Japanese Striped Maize.	Salvia Splendens.	Helianthus.

## KINDS THAT ARE VALUABLE BECAUSE OF CURIOUS HABITS IN ONE OR MORE PARTICULARS.

Animated Oats.	Musk Plant (Mimulus.)	Jerusalem Cherry (Solanum).
Coix Lachryma (Job's Tears).	Sensitive Plant.	Canary Bird Flower (Tropæolum).
Ice Plant.		

## EVERLASTINGS.

Acroclinium.)	Helichrysum.	Rhodanthes.
Gomphrenas.	Helipterum.	Xeranthemum.

## OTHER KINDS WE OFFER.

We offer about THIRTY KINDS OF ANNUALS, BIENNIALS AND PERENNIALS, besides the ones named in the lists above. Each of these possess some merit, and in the entire number referred to are many that are real favorites with cultivators. Being they are, without exception almost, easily grown, the prices per packet low, and many seeds in a packet, amateurs will find it interesting to try some packets of these along with kinds that are more choice.

Full descriptions of most of the varieties offered by us, with cultural directions, may be found in THE HOME FLORIST, which is furnished free to customers according to conditions published on page 6.

QUALITY OF OUR SEEDS.—Whether in Flower or Vegetable Seeds we sell nothing but THE BEST THAT CAN BE PROCURED. Cultivators should consider that in devoting time and money to growing Plants and Flowers from Seed, it is very important that only those of finest quality be planted, for as much attention is required to grow Flowers and Vegetables from poor seed as from the best, and in the respective results attainable with each there is a difference so great that cultivators cannot afford to treat the matter of obtaining the best quality only, too lightly. Our seeds that are not grown on our grounds are imported direct from growers in Europe, the superior quality of whose stock we have again and again had ample opportunity of testing, and while it is possible, that the quality of the kinds we offer may find its equal in the stock of other American seedsmen, we dare say emphatically it CANNOT BE EXCELLED. See "A Fair Equivalent for Prices asked," on page 3.
